

BUNKAR Machinery

Engineering Since 1986...

30 YEARS OF EXPERIENCE

ABOUT US

Bunkar Makina Filtration Expert Since 1986

In 1986, we started to work in Mecidiyeköy as an office in order to make our experience gained by working for many years at Alarko more productive. We have started to respond to the needs of fans and dust collecting systems in the market by improving our quality from the years of experience. After a short time, we showed our presence in the industry sector by turning to production in line with the increasing demands.

We have come to our current position by making breakthroughs in industrial ventilation and dust collection facilities. As a result of the superior quality and high efficiency of the fan and dust collection devices that we have produced since 1986, we have been preferred by many esteemed organizations in domestic and international productions.

SECTORS

The range of Bunkar Machinery dust collection

Products are designed and manufactured to be installed in a wide variety of industrial processes.

Applications throughout the world can be found in the following industries.

- Chemical plants
- Pharmaceutical factories
- Food processing factories
- Sugar refineries
- Agricultural and grain processing
- Pet food manufacture
- Biofuels and biomass transport and storage systems
- Wood processing and board manufacture
- Iron and steel manufacturing industries
- Cement and gypsum factories
- Plasterboard manufacturing plants
- Pulverized and solid coal handling
- Recycling facilities
- Paper manufacturing and converting
- Iron, copper and gold mine sites

JET PULSE DUST COLLECTOR

High filtration efficiency for the finest dusts

- • **Practical solutions for limited spaces.**
- • **High efficient cleaning capacity.**
- • **Long lasting spare parts.**
- • **100 % air-proof systems.**
- • **All types of guarenteed filtration solutions.**

JET PULSE CARTRIDGE DUST COLLECTOR

Advanced technology cartridge dust collectors

- • **Filter media for all types of conditions.**
- • **Cartridge filter features better self-cleaning and longer filter life.**
- • **Unique cartridge filter designs for ideal filtration.**
- • **100 % air-proof systems.**
- • **Constant efficiency and working without interruption.**
- • **Cartridge Dust collector fiber for abrasive dusts, harsh chemicals and moisture.**

WET SRCUBBER SYTEMS

Extraction of dust from luiquid

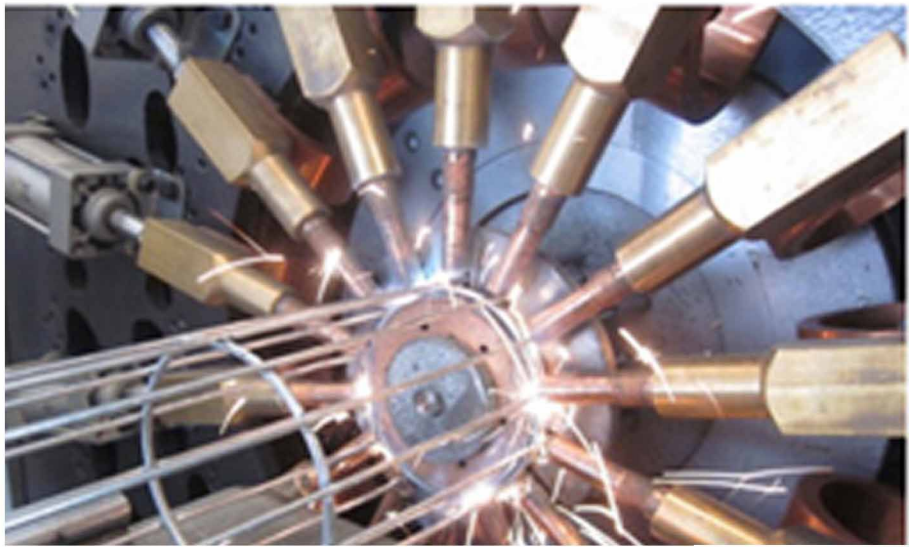

- **Low water consumption in filtering.**
- **Less service and maintenance need.**
- **Spare part friendly system.**
- **100 % water systems.**
- **All types of guaranteed filtration solutions for all industries.**

INDUSTRIAL FANS

- • Custom Made Industrial Fans
- • Axial Fans
- • Transport Fans
- • Hot Gas Circulation Fans
- • Abrasion Resistant Fans
- • High Pressure Fans
- • Fan Spare Parts and Accessories
- • Production, Maintenance and Repair
- • All sizes for all industries

FILTER BAGS & FILTER CAGES

- **Filter cages for all types and dimentions.**
- **AISI 316 / AISI 304 / St 37 / Galvanized Cover / Cataphoresis Coating.**
